# Field Day Monkira Station Western Queensland

## Friday 4 April 2008

## INTRODUCTION

The WaterSmart Pastoral Production™ project combines the best grazing management strategies with the latest technologies in stock water storage and delivery on pastoral properties.

Outcomes of the project will be greater control of total grazing pressure and stock management helping to improve pastoral land condition.

The Desert Knowledge CRC project is being conducted throughout arid Australia with demonstration sites in Queensland, the Northern Territory and South Australia.

The project is funded by the National Landcare Program, administered by the Department of Agriculture, Fisheries and Forestry and works in conjunction with Desert Channels Qld (Longreach), the Northern Territory Department of Primary Industry, Fisheries and Mines (Alice Springs) and the South Australian Arid Lands Natural Resource Management Board (Port Augusta).

The WaterSmart Pastoral Production™ Project is running until June 2008 and aims to achieve economic and environmental gains through the use of improved water management practices including new water storage, delivery and monitoring technologies on pastoral properties.

The project will provide landholders, suppliers and manufacturers with the opportunity to share information about a wide range of technologies and ideas currently available.

Field/Demonstration days are being held to promote technologies available for effective water usage as a property-wide management tool and to provide better production and sustainable outcomes for pastoralists.

Suppliers and pastoralists will be discussing and viewing through field tours and exhibitions:

- Appropriate types of equipment and designs that would commonly be needed to deliver water cost effectively around a property
- How to monitor the delivery of water to stock through remote telemetry and,
- Water as a property management tool

## FURTHER INFORMATION

Contact DK CRC Project Officer  
Colleen James  
WaterSmart Pastoral Production™  
Phone: 07 4652 7826  
Mobile: 0428 580 998  
Email: colleen.james@dcq.org.au

## WHY PARTICIPATE?

- No cost to be involved
- Opportunities to raise your company's profile amongst a valuable target audience
- Exposure to an audience of decision makers involved with all aspects of stock watering
- Opportunities for your staff to exchange ideas and discuss constantly evolving technologies with professional peers
- Inclusion of your company's name in a list of exhibitors on the WaterSmart Pastoral Production™ Webpage
- Inclusion of company information in Field day program
- Advantages of legitimate tax deductions in the areas of advertising and the promotion of products and services

## WHO WILL ATTEND?

Landholders, property owners and managers, industry representatives, funding bodies

## DATES & TIMES

The field day will be held on Friday 4 April  
Schedule as follows:

- Open to public - Friday 4 April 2008, 9am
- Closes - Friday 4 April 2008, late

## LOCATION

Monkira Station is located on the Diamantina Development Road 250km west of Windorah.

## AIRSTRIP

Compacted gravel airstrip 1000metres in length, level gradient, 247'AMSL GPS: 24.49.3S 140.33.3E

Included in the field day is:

- Field Day lunch - Friday 4 April 2008
- Field Day dinner - Friday 4 April 2008
- Breakfast - Saturday 5 April 2008

## CONDITIONS

There is limited space available so exhibitions are on a first come/first serve basis:

1. Applications must be in the hands of the Project Officer no later than 10 March 2008
2. Exhibitors must set up before 9am Friday 4th April 2008 and in the interest of the public must not remove display before 5 pm on Friday 4th April 2008
3. The Field Day Committee will not be held liable for any loss or damage to exhibitor's property whilst on site
4. All sites must be left in a tidy condition prior to departure, and all exhibitors are expected to co-operate in an effort to keep the display area in a clean condition
5. Exhibitors will need to supply entire display including poster boards, tables etc if required, as Field day will be open-air with little infrastructure
6. Minimum power available, so if display requires power, generator recommended.
7. Should the project find it necessary to cancel or postpone the WaterSmart™ Field Day all parties will be notified
8. All exhibitors must have their own public liability insurance (photocopy of your "Certificate of Currency" to be sent with registration)
